

ANTHRACITE COAL

STALLION ENERGY'S ANTHRACITE is a hard, compact variety of mineral coal that has a high luster. It has the highest carbon count, the fewest impurities, the highest calorific content of all types of coals, which also include bituminous coal and lignite. Anthracite ignites with difficulty and burns with a short, blue, and smokeless flame. **Now a day it is mostly used as a replacement of Activated Carbon and it is also called Anthracite Media.**
